

# CLOUD SOLUTIONS

TAKE YOUR BUSINESS INTO THE CLOUD WITH  
DISTRIBUTED VIRTUAL RESOURCES FROM DATAcate

At Datacate, we offer virtualized services and cloud solutions designed to meet your business needs: rapidly deployed and ready to scale. Experience all the benefits of virtualized environments on our high-availability public cloud, or with an enterprise-class private cloud infrastructure dedicated to you. Whether your needs are large or small - SaaS, PaaS or IaaS - our cloud solutions come in all sizes. Have questions? Need guidance? Consult with us about your next project – we are here to help!

## HIGH PERFORMANCE ENVIRONMENTS

Our clients are building more powerful solutions, and need them to scale quickly and frequently. Clients want hands-on granular controls without the need to touch hardware. Virtualized resources and cloud services provide the answer. At Datacate, we provide both public and private cloud solutions, and we can tailor virtualized systems to your requirements. Take advantage of virtualized computing, storage and services, and move your business into the cloud. Control, scale and distribute your online presence instantly, without the need for hardware IT resources, acquisition, tools or downtime.

## MOLDED TO FIT YOUR NEEDS

Clients with general-purpose requirements can utilize virtual resources rapidly deployed on our public cloud environment, and enjoy the high performance and availability that is standard with all of our virtualized offerings. For those who have more specific or resource-intensive applications, Datacate will build a private cloud or hybrid cloud platform tailored to those needs. We build powerful solutions and offer expert tools to conform your environment, thereby offering tremendous value to our clients.

## ABOUT US

Datacate was founded by a dedicated team of professionals that understand what it means to build, maintain, and employ comprehensive Internet solutions. We are dedicated to providing secure, reliable, high-availability Internet solutions to our clients, with excellent service and support, so that they can focus their time and efforts toward growing their business, headache-free.

We are dedicated to being the long term solution for our clients. This commitment means keeping up with the latest technologies, procedures, and implementations. By constantly finding new ways to innovate and identify efficiencies, we are able to keep both our clients and our own business ahead of the curve.

# CLOUD SOLUTIONS

## CONTROL AT A DISTANCE

Provision your virtual private server, allocate resources, and scale up your hardware. Do this all from the comfort of your home office, laptop or mobile device. We offer a secure and accessible portal for management of your virtualized resources, and we can provide customized Managed IT solutions to fit your business needs.

## FOCUS ON WHAT MATTERS

Virtualizing your server stack eliminates the need for you to provide hardware IT for your business. Our virtualization clients enjoy the benefits of complete control over their cloud-based systems, without the associated headaches of deploying and maintaining server hardware. This leaves our clients free to focus on growing their business. Contact us today to learn how virtualization can work for you!

## WE'RE ALL ABOUT THE CUSTOMER EXPERIENCE

As industry veterans, we realize that each VPS, cabinet, or circuit represents a real business with unique needs. We are here to be your technology partner and provide you the services your business requires. As your dedicated partner, our goal is to enable your success so that your business may grow and prosper. Get in touch with us today – we are here to help!
