

# COLOCATION SOLUTIONS

RELIABLE, SCALABLE COLOCATION SOLUTIONS  
TAILORED TO YOUR NEEDS

Datacate offers state-of-the-art colocation solutions in five regional US markets. All of our colocation offerings are deployed in high-performance secure facilities that meet or exceed current standards. Our locations in California, Florida and Virginia offer premium features, such as security compliance and an expanded list of on-Net carriers. Whether you need to rack a single server or plan to fill a cage, co-locate your equipment with us and get the confidence and peace of mind you need to focus on growing your business.

## ABOUT US

Datacate was founded by a dedicated team of professionals that understand what it means to build, maintain, and employ comprehensive Internet solutions. We are dedicated to providing secure, reliable, high-availability Internet solutions to our clients, with excellent service and support, so that they can focus their time and efforts toward growing their business, headache-free.

We are dedicated to being the long term solution for our clients. This commitment means keeping up with the latest technologies, procedures, and implementations. By constantly finding new ways to innovate and identify efficiencies, we are able to keep both our clients and our own business ahead of the curve.

# COLOCATION SOLUTIONS

## ROBUST DATA NETWORK

Our network utilizes an all-fiber backbone with N+2 redundancy and seamless BGP failover between primary and backup carriers. Internal network connections via industry-standard CAT6 copper and MMF up to 40Gbps\* yield ideal flexibility and scalability. We currently blend two to six carriers in each location, and typically many more providers are on-Net in each facility.

\*10Gbps and 40Gbps connectivity available in select locations; 1Gbps connectivity available in all locations. Please visit the webpage for a specific location for more information, or inquire.

## REAL EXPERTISE AVAILABLE

Our experts are here to help you choose the ideal solution for your business. We provide your business dedicated hosting services. Let our team manage your hosting while you run your business. We've seen it all and know what to recommend whether you are getting started, looking to scale, or just considering a move.
